Continuing Education & Workforce Development

Expert Job Training • **Essential** Industry Certifications • **Enlightening** Personal Enrichment Courses

Summer 2016 Class Schedule

Summer Registration is Now Open

Continuing Education & Workforce Development (CEWD) is proud to present convenient and affordable career training as well as a rich variety of personal enrichment classes for students of all ages this summer. We look forward to seeing you on campus!

Browse Classes and Register Online:
Frederick.edu/QuickEnroll

New! The Continuing Education and Workforce Development (CEWD) registration office is now located in the FCC Conference Center. With convenient hours and friendly, knowledgeable staff, we look forward to providing outstanding service to all of our students in our new location.

CEWD Registration Office • FCC Conference Center (E)

M-Th 8:30 a.m. – 8:00 p.m. • F 8:30 a.m. – 4:30 p.m. • 301.624.2888 • CEInfo@Frederick.edu

Please Note:

1. Courses requiring prerequisites and/or program manager approval may not be available for online registration. See course details for complete information.
2. Please continue to visit Jefferson Hall for services including Admissions, Counseling & Advising, and Financial Aid.
3. If you registered for a class after June 2014, an online profile is reserved in your name. Please do not create a new profile. Contact us at 301.624.2888 for assistance.

On our cover: (Left): Natalia Young, a recent graduate of the Certified Nursing Assistant program, started at FCC in the Adult Education program. This summer, she is continuing her journey as a Phlebotomy student. "At FCC, I keep improving my education. I know I can reach my goals here!" (Right): Therese Mieuheu is proud of her accomplishments in the ESL and CNA/GNA programs. "I am glad I came to FCC. Teachers welcome you and want you to do well."

Careers & Business

ACCOUNTING, BOOKKEEPING & FINANCE

Accounting Fundamentals

Demand for accounting professionals currently exceeds supply. If you're interested in increasing your financial awareness while also gaining a marketable skill, this course is for you. You'll learn the basics of double-entry bookkeeping, as well as how to analyze and record financial transactions. You'll get hands-on experience with handling accounts receivable, accounts payable, payroll procedures, sales taxes, and various common banking activities. We'll cover all the bases, from writing checks to preparing an income statement and closing out accounts at the end of each fiscal period. Whether you're a sole proprietor looking to manage your business finances or you simply want to gain an understanding of accounting basics for career advancement or for personal use, this course will give you a solid foundation in financial matters. *Course Revised November 2014.*

ONL223 | 6 weeks | \$109 fee

INSTRUCTOR: CE Instructor

5916	Online	4/8-6/10
5245	Online	7/1-8/12

Accounting Fundamentals II

While it is true that accounting professionals are scarce, those with corporate accounting experience are even more rare. This course will build on the knowledge you gained in Charlene Messier's online Accounting Fundamentals course (or another introductory accounting course) to provide you with a solid understanding of corporate accounting practices. In Accounting Fundamentals II, you'll explore such topics as special journals, uncollectible accounts receivable, plant assets, depreciation, notes and interest, accrued revenue and expenses, dividends, retained earnings, and various financial reports for corporations. If you're interested in increasing your financial awareness and accountability while also gaining a marketable skill, this is the course for you. *Course Revised February 2015.*

ONL224 | 6 weeks | \$109 fee

INSTRUCTOR: CE Instructor

5919	Online	4/8-6/10
5246	Online	7/1-8/12

Note: ONL classes start the Wednesday of the second full week of each month. During the registration process you will select the month to begin the class. Students will have six (6) weeks from the class start date to complete the class.

 **Online Course**
 **Eligible for senior tuition waiver.**
 **Eligible for disabled & retired tuition waiver.**
See pages 62-64.

QuickBooks Levels I & II

Get the full picture of your business performance and discover the new tools available in QuickBooks 2015. QuickBooks is the premier accounting software package for small to mid-sized businesses. Take charge of your business or develop your skills for the workplace. This course offers hands-on instruction from experienced CPAs. Share real world experiences in class discussions. You will learn how to set up a company file, work with customers and vendors, use basic banking tasks, track physical inventory, prepare balance sheets and accounts, process payroll, provide estimates and time tracking, and generate custom reports and forms. Prerequisites: Basic computer skills and file management and some familiarity with accounting concepts.

Note: This course has textbook requirements.

SMB212 | 24 hours | \$349 (\$259 tuition + \$90 fees)  

INSTRUCTOR: Bev Stitely

5194 MW 5:30pm - 8:30pm 7/18-8/10 FCC/E100

Introduction to QuickBooks 2013

Learn how to quickly and efficiently gain control over the financial aspects of your small business with this powerful accounting software program. In 12 lessons, you'll master the tools you'll need to set up a chart of accounts; reconcile your checking account; create and print invoices, receipts, and statements; track your payables, inventory, and receivables; create estimates; and generate reports. With QuickBooks, you get the same ease of use of Quicken coupled with a more traditional approach to accounting to meet the needs of small to mid-sized businesses. Whether you're new to QuickBooks or have already used earlier versions of this accounting software program, this course will empower you to take control of financial accounting for your business. QuickBooks Premier is required for this course.

Intermediate QuickBooks 2013

Learning how to use QuickBooks to its full potential goes far beyond learning the basic features of the program. Even many experienced QuickBooks users often struggle when applying certain business situations to QuickBooks. In this course, we'll go beyond the basic introductory concepts and you'll learn how to utilize many of the more advanced features and applications. You'll learn how to manage multiple company files and how to export and import list data from one file to the next. If your business handles inventory, you'll learn how to enter price levels and track discounts and credits. You'll even learn how to enter and track mileage that you incur on any vehicles that you use in your business. This course also covers many other common topics that small business owners encounter. You'll learn how to create customer statements, assess finance charges on overdue balances, and write off these past due balances when it appears that the customer is not going to pay. This course is designed for those QuickBooks users who already feel that they have a good grasp on the basics or have successfully completed the Introduction to QuickBooks course. Whether you are a small business owner, bookkeeper, or accountant needing a QuickBooks refresher, after taking this course, you'll feel more confident and secure in accounting for your business. QuickBooks Premier is required for this course.

Performing Payroll in QuickBooks 2013

Preparing payroll in any small business can be a daunting task. Whether you have one employee or 20, the federal and state requirements are often the same. However, by using the payroll feature in QuickBooks 2013, you can master efficient techniques for creating paychecks, paying liabilities for taxes, and generating dazzling reports quickly and easily. You'll start by learning how to prepare for the payroll process by finding the information you need on the Internal Revenue Service website. Then you'll review all aspects of how to set up and maintain payroll information for your employees in QuickBooks. You'll learn how to track work and vacation time; produce job costing reports; generate W-2, W-3, and 1099 forms; create paychecks; and much more. Once you've mastered the basics, you'll gain troubleshooting tips and solutions to help you solve common problems and mistakes to simplify the whole payroll process. By the end of the course, you'll be ready to process payroll in QuickBooks and solve many of the problems that can pop up along the way. QuickBooks Premier is required for this course.

BUSINESS

Start Your Own Business

Learn more about financing, licenses, taxes, entities, record keeping, business plans, marketing and more. This comprehensive course will teach you the steps you need to take and help you to evaluate your idea and its market feasibility.

SMB100 | 6 hours | \$99 (\$74 tuition + \$25 fees)  

INSTRUCTOR: Brett Kraimer

5193 S 9:30am - 12:30pm 7/16-7/23 FCC/H204

How Resilient Will You Be Following a Cyber Attack?

Are you prepared to repel the cyber attack that is coming to your business? Computer based attacks are increasing in frequency and complexity. Every business (and home) which uses a computer is a target for data theft and unauthorized information disclosure, which lead at best to interruption and at worst to the loss of the business. This course will disclose common methods used by computer-based attackers and share approaches and technology used for threat mitigation and response. Natural disasters pose a similar threat and require a solid emergency plan in order to mitigate data loss and prevent business down-time. This course will arm you with the information you need to prepare a solid continuity of operations plan and tailor it to known potential threats in the Maryland area.

SMB290 | 3 hours | \$139 (\$110 tuition + \$29 fees)

INSTRUCTOR: Eric Beasley

7755 Th 5:30pm - 8:30pm 5/12 FCC/E106

Note: ONL classes start the Wednesday of the second full week of each month. During the registration process you will select the month to begin the class. Students will have six (6) weeks from the class start date to complete the class.

Fundamentals of Supervision and Management

If you have recently been promoted to a supervisory or management position or want to learn how to become a more effective manager, this course will help you master the basics of business by learning the language of management. You will learn how to make a successful transition from employee to manager and you'll learn how to manage your time so that you can deal with the constant demands of a managerial job. You will learn the skills required to delegate responsibility and motivate your employees. A large part of a manager's job involves getting things done through other people, and this course will help you understand how to influence and direct other people's performance. Finally, you will learn how to solve problems and resolve conflicts so you can accomplish your job more effectively. This course is a good choice for those looking for project management experience and those aspiring to obtain a PMI credential. It's also an excellent choice for existing PMI credential holders looking for an approved activity for PMI's continuing certification PDUs. At the end of this course, you'll receive a certificate indicating your completion of Project Management Institute (PMI) PDUs equal to the number of hours of this course.

Fundamentals of Supervision and Management II

What does a supervisor or a manager need to know? Have you ever felt technically prepared for a supervisor's role, yet felt defeated by all of the people issues that seem to arise? In this six-week online course, you will learn how to be a more effective manager or supervisor. You will master the basics of communication, because effective communication is essential in your quest to be a good manager or supervisor. In addition, we will discuss how you can develop your interpersonal skills, by understanding and dealing with the various people issues that arise at work. We are going to show you how you can understand various personality traits—in yourself and in others—and how they impact the ability to get the job done. These traits include emotional intelligence, the need for power, conscientiousness, agreeableness, and more. You will be able to assess your own personality, as well as the personalities of your co-workers and boss, and you'll develop a plan of action to improve both your interpersonal skills and your work relationships. This course is a good choice for those looking for project management experience and those aspiring to obtain a Project Management Institute credential. It's also an excellent choice for existing PMI credential holders looking for an approved activity for PMI's continuing certification PDUs. At the end of this course, you'll receive a certificate indicating your completion of PDUs equal to the number of hours of this course.

NEW! Understanding Workplace Talents and Personalities

Have you ever wondered why you work really well with some people and seem to clash with others? Each of us has a natural style of thinking, processing information, problem solving, and communicating. Often workplace conflicts arise simply because communications are misunderstood. For a manager, trying to improve productivity and maintain harmony, building smooth relationships can be a challenge. In this program, you will assess your own personality style and recognize the traits of those around you. Managers will learn to weigh the talents and skills each team member contributes. You will learn how to show appreciation for the diverse personalities around you and begin building team cohesiveness. Using historic role models Eleanor Roosevelt and Gandhi, along with Churchill and Eisenhower (from the earlier sessions), you will see how different personalities can be equally effective, though they exhibit different behaviors and styles. DiSC personality assessment concepts will be used.

CHILD CARE CAREER PREP

Child Growth and Development

This certification course satisfies the child development half of the MSDE requirement of 90 hours for child care teachers and directors. Gain a broad overview of major concepts, theories and research related to the social, emotional, cognitive, and physical development of the child from birth through age 12. This course and a 45-hour course in age-appropriate curriculum (preschool infant-toddler, or school-age) are required to complete the 90-hour certification for child care. Aligns with Md Staff Credential (proposed) levels 2-4. You must successfully complete all course assignments to receive a course certificate. Purchase textbook from FCC Bookstore prior to class. This class is held in partnership with Howard Community College.

Note: A textbook is required for this class.

CHI300 | 45 hours | \$304 fee

INSTRUCTOR: CE Instructor

5202 Online 7/15-9/2

Preschool Curriculum and Activities

Become prepared for a position in a child care center or preschool. This certification course satisfies the curriculum half of the MSDE requirement of 90 hours of training for child care teachers and directors working with preschoolers. Basic concepts of curriculum planning and implementation for children three to five years old are introduced. Topics include: teaching strategies, environment design, and implementation of best practices in early childhood education. Aligns with Md Staff Credential (pro-posed) levels 2-4. This course and Child Growth & Development 45 hours are required to complete the 90-hour child care certification. You must successfully complete class assignments to receive a course certificate. Purchase textbook from FCC Bookstore prior to class. This class is held in partnership with Howard Community College.

Note: A textbook is required for this class.

Keyboarding

If you want to learn touch-typing or improve your existing typing skills, this is the perfect course for you! In these lessons, you'll use the Keyboarding Pro 5 program, a typing tutorial designed for personal computers, to learn how to touch-type - that is, to type text you read from a printed page or a computer screen without looking at your keyboard. Using Keyboarding Pro's built-in word processor, you'll learn how to create, edit, and save word processing documents. As you improve your typing speed and accuracy, you'll use the word processor's timed writing feature to continually hone your skills. You'll even learn posture tips to minimize fatigue and help prevent carpal tunnel syndrome. With the skills you master here, you'll become faster and more confident at the keyboard. By the end of the course, you'll know how to touch-type the alphabetic, numeric, and symbol keys; create, save, and edit word processing documents; and successfully take a timed writing test during a job interview.

5208 TTh 5:30pm – 8:30pm 7/12–7/14 FCC/E100

Introduction to Microsoft Outlook 2010

Are you overwhelmed by emails, meetings, and to-do lists? Harness the power of Microsoft Outlook 2010, and you'll instantly enhance your efficiency and productivity. In this course, you'll learn your way around the new ribbon-based interface and get up and running quickly. Then you'll focus on the core skills you really need in order to work smarter and faster. First, you'll learn how to manage the flood of emails you receive, creating folders and archives so you can always find what you need. Then you'll discover how to keep track of your contacts and how to use Outlook's Calendar and Alert features. You'll also find out how to customize Outlook so it perfectly meets your needs, and you'll discover how to automate your work with rules. As a bonus, you'll get insider tips that will make you the Outlook guru in your office. For example, did you know that you can create, send, and receive email messages without ever touching the mouse? You'll find out how, and learn lots of other tricks for getting the most out of Outlook's versatile tools. Whether you're new to Outlook or you've been using it for years, you're sure to learn something useful in every lesson. In just a few weeks, you'll be a skilled and confident user of this time-saving tool - and you'll never have to worry about missing a meeting, losing an email, or forgetting an important task again!

Introduction to Microsoft Outlook 2013

Want to learn Microsoft Outlook 2013 quickly? In this course, you'll get up and running with the most important aspects of the program, starting with mastering the Windows 8 style look and feel. From there, you'll quickly learn how to manage your email, calendar, and contacts, and how to streamline and automate your work with keyboard shortcuts, rules, Search Folders, and Quick Steps. The goal of this course is to teach you what you really need to know to be productive with Outlook 2013. Instead, you'll focus on the important things like sending, receiving, and managing your mail, and using tools such as the calendar, tasks, and to-dos so you can manage your schedule and get your work done. You'll also learn about the redesigned Contacts section of Outlook (now called People), and how Outlook can connect to your social networks. The course also shares tips about how to get the most from Outlook. Whether you're new to Outlook or you've been using it for years, you're sure to learn something useful in every lesson.

Advanced Microsoft Excel 2010

Any proficient Microsoft Excel user will agree that this program is a very powerful analytical tool. Wouldn't it be great to learn how to effectively use all the advanced Excel features? In this practical and information-packed course, you'll see how to maximize this program's functions and capabilities. Most organizations rely heavily on Excel to consolidate, analyze, and report financial information. Your company is probably no exception. By learning these advanced techniques, you can become more valuable to your organization. You'll see how to work with the additional analytical tools provided by Excel add-ins and become skilled in using validation to protect the integrity of your worksheets from less experienced users. Impress your coworkers by learning how to add functional and eye-catching custom controls to any worksheet and how to use scenarios and data tables to quickly perform what-if data analyses. You'll discover advanced techniques for PivotTables, such as creating calculated fields and calculated items. Become adept at consolidating and importing external data, and master the art of conditional formatting to highlight duplicate entries and other common worksheet problems. Learn how Excel 2010 table tools take the complexity out of table creation and management. As you become proficient at nesting functions within other functions, you'll be able to accomplish just about anything Microsoft Excel has to offer!

PROGRAMMING

Introduction to SQL

Learn the key concepts of Structured Query Language (SQL), and gain a solid working knowledge of this powerful and universal database programming language. In this course, you’ll learn about the basic structure of relational databases and how to read and write simple and complex SQL statements and advanced data manipulation techniques, discover how to use SQL to sort and retrieve data from tables and how to use SQL to filter retrieved data, learn how to reformat retrieved data with calculated fields and how to merge columns and create alternate names for columns, and learn how to gather significant statistics from data using aggregate functions. By the end of this course, you’ll have a solid working knowledge of structured query language. You’ll feel confident in your ability to write SQL queries to create tables; retrieve data from single or multiple tables; delete, insert, and update data in a database; and gather significant statistics from data stored in a database.

Intermediate SQL

Expand your knowledge of Structured Query Language (SQL), the industry standard database programming language. In this course, you’ll learn techniques that will enable you to write powerful queries that perform complicated searches and sorts on your data. Next, you’ll master advanced techniques for updating various types of data stored in your tables. In addition, you’ll use advanced insertion techniques to add data to your tables and learn how to create, query, and modify temporary tables. You’ll also see how to implement techniques to handle duplicate values stored in a table and how to use string functions to perform complicated searches on strings as well as, how to create queries that accept input from users. By the end of this course, you’ll be able to use a wide range of advanced SQL techniques with confidence. Your new skills with databases will enhance your competitiveness in the technical fields of software development and database administration.

Introduction to C# Programming

Learn the fundamentals of computer programming with C#, the in-demand and incredibly useful programming language that incorporates the best features of Visual Basic, C++, and Java. You’ll first develop your understanding of programming fundamentals: input/output operations, decision making, and looping. Then, we’ll explore the many benefits of object oriented programming, with plenty of vivid, real-life examples. Then, you’ll gain hands-on experience with sequential data files, and you’ll be able to build a professional-looking and intuitive Graphical User Interface (GUI) application on your very own computer. Because there is no better way to learn programming than hands-on practice, almost every lesson includes practical examples and assignments you can use to develop your knowledge of programming. Learn to program the right way: by using a state-of-the-art language to build impressive applications on your schedule and on your very own computer.

Introduction to Java Programming

If you want to learn computer programming but don't have any prior experience, you'll enjoy a tour of Java, one of the most widely used computer languages in the world. It's a breeze to learn in a friendly and supportive environment. Start with the basics of programming and go on to write your own programs and integrate input and output, calculations, decision making, and loops. Build your knowledge and confidence with easy-to-understand examples and plenty of skill-building exercises. So whether you just want to try it out to see if you like it or plan on doing more with Java, this is a great place to start! We'll use the latest release of Java, from Oracle, the company that maintains and supports the language. We'll also use BlueJ, a graphical development environment designed especially for students. Both are free open-source products, and I'll give you the proper instructions to download them. By the time we're done, you'll be comfortable with Java programming and ready for more! *Course Revised November 2013.*

WEB DEVELOPMENT

WordPress, Level I

This introductory hands-on course will focus on what WordPress is, what it can do, and how to use it for a blog, a website, or both. Students will work on WordPress site provided for them for use during the class. This class is perfect for staff responsible for a company WordPress website or blog. Prerequisite: Computer and web browser proficiency.

INT171 | 5 hours | \$149 fee

INSTRUCTOR: **Jeannine Morber**

8253 F 9am - 2pm 6/3 FCC/E107

WordPress, Level II

Learn to add more functionality to their WordPress website and blog by installing and configuring WordPress plugins. Students will also learn to change the look of the website by installing and configuring a new theme. This is a hands-on workshop where students will work on WordPress sites provided for them to use during class. Prerequisite: WordPress Level One or permission of the instructor.

INT172 | 7 hours | \$199 fee

INSTRUCTOR: **Jeannine Morber**

8254 F 9am - 4pm 6/10 FCC/E107

WordPress, Level III

Explore more advanced plugins and features of WordPress such as search engine optimization, website backup, spam filters, and login in tracking and security plugins. This is a hands-on workshop where students will work on WordPress sites provided for them to use during class. Prerequisite: WordPress Level Two or permission of the instructor.

INT173 | 7 hours | \$199 fee

Creating Web Pages

Create and post your very own website on the Internet using HTML in this extensive, hands-on, six week workshop. First, you'll learn about the capabilities of the World Wide Web and the fundamentals of web design. Then, with your instructor's patient guidance, you'll plan the content, structure and layout of your website, create pages full of neatly formatted text, build links between the pages and to the outside world, and add color, backgrounds, graphics, and tables. You'll also learn critical and timely information on securing the best possible location in search engine listings, and powerful no-cost or low-cost web marketing strategies.

ONL101 | 24 hours | \$109 fee

INSTRUCTOR: **CE Instructor**

7963 Online 4/8-6/10

Note: ONL classes start the Wednesday of the second full week of each month. During the registration process you will select the month to begin the class. Students will have six (6) weeks from the class start date to complete the class.

Advanced Web Pages

Take your Web design skills to the next level! Whether you want to work as a freelance Web designer, join a Web development team, or build websites for your organization, this course will give you the advanced tools you need. In these lessons, you'll learn to write HTML code for page content and CSS code for page styling. You'll master cutting-edge techniques that take advantage of HTML5 and CSS3, the latest versions of the languages used to create modern websites. With the help of step-by-step instructions, you'll build interactive websites that collect information from visitors through email signup and feedback forms. In addition, you'll learn the latest and most effective techniques for presenting layouts and video that work in any browsing environment from a desktop computer to a mobile device. Along the way, you'll explore aesthetics, color scheming, and accessible Web page design. And don't worry if you have only the most basic exposure to Web design! This course walks you all the way through to purchasing and uploading your site to a remote server. You won't need any special software, either - just the text editor that comes installed with your computer. Whether you're a beginner or an experienced Web designer wanting to update and enhance your skills, this course is perfect for you. In just a few weeks, you'll be designing state-of-the-art websites that offer all the sophisticated elements that today's Web users expect to see.

Write Effective Web Content

Is your Web content as effective as it could be? In this course, you'll gain tips for crafting content to make your website or blog into an exciting multimedia place for visitors. You'll learn how to develop a website writing style that speaks to your readers' needs and ensures that your content is clear and easy-to-understand. We'll explore ways your Web copywriting can convey the right "feel" through your content, how to get conversations going with your visitors, and how to organize your content to produce better search engine rankings and happier readers. But today's Web is about a lot more than words. You'll also explore all kinds of multimedia from images to infographics to slideshows to screencasts, as well as ways to encourage interaction with your readers, such as polls, surveys, and quizzes. By the end of this course, your content will be well on its way to rising to the top of the billions of pages on the Web!

IT CERTIFICATION PREPARATION

CCNA: Networking III

This course provides a comprehensive, theoretical, and practical approach to learning the technologies and protocols needed to design and implement a converged switched network. Students learn about the hierarchical network design model and how to select devices for each layer. The course explains how to configure a switch for basic functionality and how to implement Virtual LANs, VTP, Inter-VLAN routing, and Spanning Tree Protocol in a converged network. In conjunction with the Cisco Networking Academy, students also develop the knowledge and skills necessary to implement a WLAN in a small to medium network. Most class lessons, materials, and labs are accessed via the web; however, students and instructor also will interact at scheduled times via online classroom and will require two Saturday meetings. Meeting dates and times will be scheduled by the instructor and enrollees. Students must have a personal computer and Internet access (broadband is recommended) to complete online assignments and exams. Students must take Networking II before registering into this course.

Note: This course is not available for online registration. Registrations will be accepted at the Welcome and Registration Center at FCC's main campus, Jefferson Hall, 1st floor. For more information, contact Adrienne at 240-629-7987. Students must have A+ or equivalent experience either in class or work and have successfully completed CCNA II. At Your Own Pace-Web Based and Distance Learning Technologies Weekly online webinars.

CCNA: Networking IV

This course covers the WAN technologies and network services required by converged applications in Enterprise Networks. Students learn how to implement and configure common data link protocols and how to apply WAN security concepts, principles of traffic, access control and addressing services. Natural Address Translation (NAT) and DHCP services are also covered. Most class lessons, materials, and labs are accessed via the web; however, students and instructor also will interact at scheduled times via online classroom and will require two Saturday meetings with the instructor. Meeting dates and times will be scheduled by the instructor and enrollees. Students must have a personal computer and Internet access (broadband is recommended) to complete online assignments and exams. Networking III must be successfully completed to enroll in the Networking 4 course.

Note: This course is not available for online registration. Registrations will be accepted at the Welcome and Registration Center at FCC's main campus, Jefferson Hall, 1st floor. For more information, contact Adrienne at 240-629-7987. Students must have A+ or equivalent experience either in class or work and have successfully completed CCNA III. Basic CompTIA® A+ Certification Prep

Time to roll up those sleeves and dive inside the personal computer! The Basic CompTIA A+ Certification Prep course teaches you about the hardware common to virtually every personal computer, including microprocessors, RAM, power supplies, motherboards, BIOS, CMOS, the expansion bus, and input/output devices. You'll learn how things work, how to configure everything, and how to troubleshoot in real world environments. This course gives you the knowledge upon which you'll base the rest of your CompTIA A+ certification studies for the 220-801 and 220-802 exams. Plus it helps you take that first step to becoming an excellent PC technician. So what are you waiting for? *Course Revised January 2014.*

Intermediate CompTIA® A+ Certification Prep

The Intermediate CompTIA A+ Certification Prep course picks up where the Basic course left off and plunges you head-first into Windows. You learn how to install, organize, maintain, and troubleshoot three different versions of Windows. You'll examine and compare the features and structures of Windows XP, Vista, and 7. Toward the end of the course you'll get a deeper understanding of how we use virtualization and virtual machines in modern networks. Plus you'll learn about printers, from the various technologies in use to installing and troubleshooting. This course takes you through the second of three steps you need to become both a highly-competent PC tech and a CompTIA A+ certified technician, using the 801 and 802 competencies.

CompTIA® Security+ Certification Prep 1

The U.S. Department of Labor forecasts that information security analysts will be among the fastest-growing occupations through 2022. CompTIA's Security+ certificate is widely regarded as the entry-level certificate for this fast-growing field. Getting that certificate requires passing CompTIA's challenging SY0-401 exam. This course covers the key terminology and concepts you need to know to ace the exam, all in a condensed format for rapid reading. The course provides helpful study tools including crossword puzzles, games, and practice questions to aid with learning. All of the content is geared toward helping you pass the SY0-401 exam so you can leave the test center with your Security+ certificate in hand. Please note that if you received your CompTIA Security+ certification before 1/1/2011, you will be a lifetime credential holder not subject to credential renewals. However, if you achieve your certification after 1/1/2011, you are subject to a CompTIA Security+ renewal process every three years. *Course Revised November 2014.*

Health Care Careers

CERTIFIED NURSING ASSISTANT (CNA/GNA)

PREREQUISITE INFORMATION: This course is not available for online registration. Registrations will be accepted at FCC's main campus. For more information, contact FCC at 240-629-7904. Prerequisites & other requirements: Placement into EN52 or ESL99 (Students will need to take placement tests in the college's Testing Center), provide proof of being 18 years of age or older at time of registration, CAH144—Introduction to Health Care Careers, and CAH143—Introduction to Allied Health Skills. In person or mail in registration will be required. Other program requirements PRIOR to Clinical: Provide evidence of a negative TB test or chest X-ray. Undergo a physical examination and provide proof of up-to-date immunizations. Current American Heart Association Health Care Provider CPR card or SAF112—Health Care Provider CPR. Provide proof of health insurance. Undergo a background investigation and fingerprinting. Fees for background check and fingerprinting are included in course fees. Students will receive paperwork for their physical exam, immunizations, fingerprinting and background check during the beginning of the CNA course, CAH132.

CAH 144 Intro to Health Care Careers

Gain the knowledge and skills needed to perform effectively in a learning environment and work productively in a health care setting. You will learn basic competencies of anatomy and physiology, HIPPA, workplace professionalism, communication and customer service, diversity, cultural competencies, task prioritization, and documentation specific to the health care environment. Required course for students entering Certified Nursing Assistant Program or Phlebotomy Technician Program.

CAH 143 Intro to Allied Health Skills

This course is designed to introduce you to the basic patient skills required as a health care professional. Continue your understanding of anatomy and physiology, the techniques of determining vital signs, blood pressure, respiration, pulse, and patient communications. These skills enable you to function more effectively as a professional in a health care setting. Required course for students entering Certified Nursing Assistant Program or Phlebotomy Technician Program.

CAH 132 Certified Nursing Assistant, Part 1

Learn basic patient care skills, the role as a member of the health care team, disease processes, infection control and safety issues. Combined with the clinical sessions, this course meets all requirements to be eligible for CNA certification in the state of Maryland and prepares students for the Geriatric Nursing Assistant (GNA) test which is included in course costs. All tests must be completed and passed prior to starting the clinical sessions.

CAH 133 Certified Nursing Assistant, Part II

Part 2 is a continuation of Part 1.

CAH 114 Certified Nursing Assistant—Clinicals

Participate in supervised clinical rotations with experienced, certified nursing faculty in local health care facilities. Students interact with residents, performing all the duties and responsibilities of a nursing assistant. Individual skills and execution are evaluated daily.

PHLEBOTOMY TECHNICIAN

PREREQUISITE INFORMATION: This course is not available for online registration. Registrations will be accepted at FCC's main campus. For more information, contact FCC at 240-629-7904.

Prerequisites: Placement into EN52 or ESL 99 (students will need to take placement tests in the college's Testing Center), provide proof of being 18 years of age or older at time of registration, CAH 144-Introduction to Health care Careers and CAH 143 – Introduction to Allied Health Skills. In person or mail in registration will be required. Other program requirements PRIOR to Clinical: provide evidence of a negative TB test or chest X-ray, undergo a physical examination and provide proof of up-to-date immunizations, current American Heart Association Health care Provider CPR card or SAF 112-Health care Provider CPR, provide proof of health insurance, undergo a background check and fingerprinting. Fees for background check and fingerprinting are included in course fees. Students will receive paperwork for their physical exam, immunizations, fingerprinting and background check during the beginning of CAH 483.

CAH 144 Intro to Health Care Careers

Gain the knowledge and skills needed to perform effectively in a learning environment and work productively in a health care setting. You will learn basic competencies of anatomy and physiology, HIPPA, workplace professionalism, communication and customer service, diversity, cultural competencies, task prioritization, and documentation specific to the health care environment. Required course for students entering Certified Nursing Assistant Program or Phlebotomy Technician Program.

CAH 143 Intro to Allied Health Skills

This course is designed to introduce you to the basic patient skills required as a health care professional. Continue your understanding of anatomy and physiology, the techniques of determining vital signs, blood pressure, respiration, pulse, and patient communications. These skills enable you to function more effectively as a professional in a health care setting. Required course for students entering Certified Nursing Assistant Program or Phlebotomy Technician Program.

CAH 483 Phlebotomy Technician Preparation I: Theoretical Applications

In Part I, Theoretical Applications, students learn basic phlebotomy technical background and professional preparation for working as a phlebotomist. Students are introduced to anatomy and physiology with special emphasis on the cardiovascular and lymphatic system, applicable medical terminology and an overview of health care settings where phlebotomy services are performed. Students learn and apply professional ethics and behavior; interpersonal and written communications, including cultural competency; systems of documentation; and safety and infection control. Students will develop knowledge and comprehensive skills to prepare them to perform venipunctures completely and safely as they progress to Part II: Practical Applications. The full program includes classroom and both in-class and on-site clinical practice at local health care facilities. This program requires study time outside of class and includes both written and practical (hands-on) skills assessments, which must be passed prior to starting the clinical course. The program prepares students to take a national certification with the American Society for Clinical Pathology.

CAH 484 Phlebotomy Technician Preparation II: Practical Applications

Phlebotomy Technician II: Practical Applications is a continuation of Part I: Theoretical Applications. In this course students learn to perform venipuncture and specialized phlebotomy procedures. Students are familiarized with blood collection equipment and selection, specimen handling and identifying complications related to blood collection and medical errors. Students train on a variety of procedures and techniques for typical and special populations clients. Special topics in specimen uses for testing in forensics, workplace and sports are explored. Hands-on skills practicums prepare students for the clinical course. The full program includes classroom and on-site clinical practice with experienced phlebotomists at local health care facilities to give students hand-on professional experience and prepares students to take a national certification with the American Society for Clinical Pathology. The program requires study time outside of class and includes both written and practical (hands-on) skills assessments, which must be passed prior to starting the clinical course.

CAH 466 Phlebotomy Technician Clinical

Participate in 100 hours of supervised clinical rotations with experienced phlebotomists in local health care facilities. Students will perform 100 supervised venipunctures. Individual skills and execution will be evaluated daily. Clinical offers daytime hours only. Hours vary based on clinical location.

Medicine Aide Update

Meets the Maryland Board of Nursing renewal requirements for the Certified Medicine Aide (CMA). Designed to keep the practicing CMA informed and updated regarding new medications, non-parenteral drug administration, policies and practices, and medications needed by geriatric clients. Emphasis is on new drug therapies and the role of the medicine aide in providing safe and competent care. Upon registration, students must submit a copy of their current CNA/GNA certification, proof of successful completion of their initial CMA training course in Maryland, and must verify current CNA practice of at least 16 hours within the last 2 years, and must verify active practice as a CNA/GNA/CMA in a licensed nursing home for at least 8 hours within the last 2 years, and must verify active practice as a CMA for 100 hours within the last 2 years. Verification can be provided by the employer on facility letterhead. Please note: The Maryland Board of Nursing requires that this update must be completed no more than 90 days before the expiration of the CNA/GNA/CMA certification.

Note: Call 240-629-7904 if interested in the class. You must meet with the Program Manager before registering in order to verify all documentation.

Special Notice: Mount Airy College Center Health care Programs Return to FCC Campus

The Mid-Maryland Health Care Consortium, consisting of Carroll, Frederick, and Howard community colleges, collaborated to open the Mount Airy College Center for Health Care Education in 2012 to bring health care education to students in one centralized location.

After serving more than 2,000 students, the center's academic programs will be returning to each respective home campus following the spring 2016 semester. While the center is closing, the Mid-Maryland Health Care Consortium remains strong, allowing students at each college to benefit from partnership agreements, and we continue our mission of providing pathways to student success.

*Please refer to FCC schedules for current class offerings and registration information.
If you have any questions, our friendly staff is ready to assist you.*

Medical Terminology: A Word Association Approach

This course teaches medical terminology from an anatomical approach. Root terms are divided by each body system. The origin, a combined form, and an example of non-medical everyday usage is provided for each root term. Word Associations are provided as a learning tool. Unusual and interesting information is provided in regards to each term. Root terms are combined with prefixes and suffixes as your learning will culminate in the interpretation of several paragraphs of medical notes.

Note: This course is 24 hours of instruction online. Classes start the second Wednesday of each month. Students will receive and email with course access and log-in information. During registration students will be prompted to select a month they wish to enroll. Start dates include: 5/11/2016, 6/8/2016

Medical Billing and Coding:

Medical billing and coding is one of the fastest-growing careers in the health care industry today! The need for professionals who understand how to code health care services and procedures for third-party insurance reimbursement is growing substantially. Physician practices, hospitals, pharmacies, long-term care facilities, chiropractic practices, physical therapy practices, and other health care providers all depend on medical billing and coding for insurance carrier reimbursement. This billing and coding program delivers the skills students need to solve insurance billing and coding problems. This course is designed to prepare students to sit for various national certification exams including those from the American Academy of Professional Coders (AAPC) and the American Health Information Association (AHIMA). Prerequisite: Medical Terminology.

Note: This course is not available for online registration. Registrations will be accepted at the Welcome and Registration Center at FCC's main campus, Jefferson Hall, 1st floor. For more information, contact FCC at 240-629-7904. Prerequisite of Medical Terminology

Personal Enrichment

ARTS

Basic Drawing

Some people think they can not draw a straight line, but everyone can learn to draw. Learn to draw 3-dimensional forms, and figure drawing. Learn about light and tone, negative and positive shapes, shading, perspective and measured drawing. Experiment with charcoal, pastel and colored pencil. You will gain confidence in drawing and complete several drawings. A supply list will be provided to registered students before class.

ACR523 | 12 hours | \$129 tuition

INSTRUCTOR: **Dorothea Barrick**

8275 TTh 9:30am – 12:30pm 6/14–6/23 FCC/F131

Classic Drawing

Students who desire to achieve a high level of skill and excellence in realism, like that of the Old Masters, will thoroughly enjoy developing their technical skills in this course. Geared towards the beginner, the instructor will work closely with each student to assist in the accurate progression of each drawing. After completing one session, students will be able to center a composition, render the objects reasonably in proportion and perspective, and execute the four elements of shading. While still life will be the subject matter and graphite pencils will be the media, students will learn how to begin and complete one large detailed finished drawing. A supply list will be provided to the students during the first class.

ACR420 | 15 hours | \$139 tuition

INSTRUCTOR: **Jennifer Littleton**

NEW! Recycled Art: Creating artwork with imagination

Beauty is in eye of the beholder and the eye of an artist! In this course you will learn how to use nontraditional materials to create unique artwork. Think beyond pencils and paint. We will be making both 3D and 2D art using found or recycled materials such as Magazines, Please be prepared to pay the instructor on the first day of class a \$25 fee for the "art kit" to be used in class.

ACR427 | 8 hours | \$79 fee

INSTRUCTOR: **Courtney Prahl**

8271 MW 6pm – 8pm 5/11–5/23 FCC/F130

Stained Glass, Beginning

Do you admire colorful stained glass windows and suncatchers and then wonder how you can create these beautiful pieces of artwork? In our class you will design and create a least three stained glass objects. First you will learn the history and then you are hands-on using the techniques of glass cutting, copper foiling and soldering. This class is for beginners or anyone you is interested in the art of stain glass making. Students please plan to pay the instructor a \$25 fee for the stained glass supplies on the first day of class.

ACR450 | 9 hours | \$89 tuition

INSTRUCTOR: **Pat Stein**

8274 S 9am – 3pm & S 9am – 12pm 6/11–6/18 FCC/F118

Glass Fusing Jewelry: Pendants, Bracelets and Pins

Looking for that unique holiday gift? Create gorgeous, one-of-a-kind pendants, wine bottle stopper, bracelet, and/or pins to give as a holiday gift for someone or gift it to YOURSELF! Make your own holiday gifts and give one-of-a-kind gifts to the special people in your life. Create unique and beautiful glass pendants, a bracelet, pins, a wine bottle stopper and MORE using fusible glass, dichroic glass, frit, and mosaic pieces. Students will learn the basics of fusing, learn how to cut and grind glass, clean pieces, and assemble their pieces. Students will be able to make as many pieces as possible during the three hour session. Finished items will be fused in a kiln and returned the following week for pick up. Supply fee of \$25 is payable to the instructor which includes glass and some jewelry findings. NO GLASS CUTTING EXPERIENCE REQUIRED!

ACR326 | 3 hours | \$39 tuition

INSTRUCTOR: **Pat Stein**

Note: ONL classes start the Wednesday of the second full week of each month. During the registration process you will select the month to begin the class. Students will have six (6) weeks from the class start date to complete the class.

Introduction to Digital Scrapbooking

Learn to use digital editing techniques to show off your photos and memorabilia in Introduction to Digital Scrapbooking! Using Photoshop Elements 11, 12, or 13, this course will teach you how to make the most of your scrapbooking talents and artistic ideas when you combine traditional and digital scrapbooking. Starting with simple projects, you'll quickly learn how to build pages, use artistic journaling, and produce sophisticated illusions. Photoshop Elements lets you build your own clip art, create frames, and develop multi-layer pages with an endless array of layouts and designs. You'll see how to draw and create your own art, build collages and scrapbooks to share, and work with both color and black and white. If you need to restore or age images—the tools are all available to you. *Course Revised November 2014.*

Introduction to Interior Design

Are you a creative person with an eye for design? If so, this course will show you how to transform plain living spaces into beautiful and functional rooms. Interior design takes training as well as talent, and these lessons will give you the know-how you need to design a room from floor to ceiling. You'll delve into color theory, industry trends, spatial arrangements, floor plans, traditional and modern interior design ideas, and other basics. In addition, you'll explore a range of careers in interior design and get insider tips for entering this exciting field. Because interior design is constantly evolving, you'll also learn about some of the latest trends affecting the industry. You'll investigate "green" sustainable design, and you'll find out how to modify your designs for people with special needs. As you master design skills step-by-step, you'll complete your first project: a fully developed room design complete with spatial layout, lighting, and finish selections. Your new knowledge and hands-on practice will give you the confidence you need to start creating beautiful residential interiors for yourself and others.

Photographing People With Your Digital Camera

Photographing people can be fun, exciting – and complicated! This course will make taking beautiful pictures of adults, children, and babies simple. Don't be nervous if you're new to digital photography, because we'll start with the basic principles you need to know in order to become a people photographer. You'll discover the best way to shoot faces, fix common close-up problems, and use digital photo editing techniques to retouch your photos and make other improvements. Next, we'll move onto portrait and formal group shots, where you'll learn how to organize people, which angles to use, and which to avoid. You'll become proficient in action photography, and you'll also learn several fun and creative ways to photograph children and babies. You'll even gain expertise in filling your photographs with imagery, setting moods, and creating themes. This course will have you well on your way to becoming a skilled people photographer.

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

Secrets of Better Photography

Master your digital camera and learn the secrets behind outstanding photos! Whether you have a digital SLR, a point-and-shoot camera, or something in between, you'll learn how to use it the way you want to in this hands-on course! You also have the opportunity to have your lesson assignments critiqued by our knowledgeable teaching team of professional photographers. You'll see how to choose the best photographic equipment for you and how to compose images with style. Exposure topics like aperture, shutter speed, metering, and ISO settings will all make sense as we break them down into simple concepts. If you want to work with manual exposure on your digital SLR, we cover that, too! We'll also explore natural and artificial lighting, freezing or blurring motion, portraiture, children's photography, pet photography, photojournalism, and digital editing options. Secrets of Better Photography is also an excellent class to prepare you for the more advanced class, Travel Photography for the Digital Photographer.

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

Introduction to Photoshop CS6

Photoshop is the world's best-known photo-editing program. Artists, photographers, designers, and hobbyists all rely on Adobe Photoshop for image creation and editing. You'll learn how to use Photoshop with detailed, step-by-step instructions that you'll have no trouble following—even if you've never used a computer graphics program before! And you'll have a lot of fun doing it. Photoshop CS6 has a host of impressive new features for photographers, and you'll encounter a number of them. We'll begin with an introduction to the Photoshop environment. Next, you'll learn techniques for creating simple digital paintings (including some brushes that let you create the look of an oil painting from a photo). Then you'll be editing your own photographs to get rid of dust and scratches, fix the color, and correct image exposure. You'll master techniques for switching the backgrounds on images and removing wrinkles and blemishes from photos, just like they do in magazines. You'll also learn about the new content-aware Move tool in CS6 that, like magic, lets you move something on an image while intelligently replacing the "hole" left behind. By the time you finish this fun, hands-on, project-oriented course, you'll be well on your way to expressing yourself with the most exciting graphics program ever developed.

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

PERSONAL ENRICHMENT

Intermediate Photoshop CS6

Photoshop is one of the most amazing software programs ever developed. It's a fun and creative way to alter photos and prepare them for print or the Web. In this course, you can take your Photoshop skills to the next level by exploring more advanced features in Photoshop that let you easily re-edit projects long after they were originally created (and long after the Photoshop "undo" command has expired). These techniques, called non-destructive editing, let you work faster and reuse parts of images over and over again. If you like scrapbooking or want to make page layouts that you can fill with different graphics, you'll learn how to create reusable templates. You'll see how to use Smart Objects, so that even if you crop or resize an image. Whether you're a photographer who wants to use Photoshop to edit photos, a scrapbooker, or an artist, this course will teach you the building blocks you need to unleash your creativity. It's also a lot of fun!

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

Beginning Conversational French 

This course will teach you how to communicate easily and comfortably with those who speak French. You’ll learn practical, common phrases that will make your trip to the many French-speaking regions of the world more pleasant. Each lesson introduces a scenario, presented in short dialogues. You’ll be able to practice and learn both sides of the conversation, so you’ll easily understand and expect common responses. Every lesson also has cultural tips, which will make you more comfortable in a foreign setting. Since proper pronunciation is important to good communication, this course will help you master the best pronunciations. Simply click on each word to hear it spoken! Every word and sentence is also written out phonetically using sounds that you are already very familiar with from English words. This course has been carefully crafted to ensure you will have no trouble pronouncing French words correctly. This course makes learning French fun and surprisingly easy. You’ll be pleased with your quick progress, and you’ll be prepared for your next trip!

PERSONAL ENRICHMENT

Instant Italian

This dynamic course will teach you how to express yourself comfortably in Italian. You'll learn practical, everyday words and phrases that will make your stay in Italy more enjoyable. You'll read, hear, and practice dialogues based on typical situations that you're likely to encounter while staying in Italy. The dialogues and follow-up exercises of each lesson will teach you to communicate in Italian in a wide variety of settings. You'll be surprised by how quickly and easily you can learn many useful expressions in Italian! Essential words and phrases are written phonetically by using sounds that are familiar to you from English words. The course audio feature lets you hear the words and phrases spoken aloud with just a click of your mouse. Short exercises are included with each lesson to help you reinforce what you've learned and gauge your progress, making it easy to pinpoint areas that you still need to review. The exercises also give you immediate feedback—you'll know whether you answered correctly as soon as you finish. You'll be pleased at how quickly this course helps you build your skills, and prepares you for your next adventure in Italia.

Discover Sign Language

It's truly amazing that we can communicate just by using our hands! Add different facial expressions, and you have a conversation—the language of Deaf people. In this course, you'll discover how to use this graceful, expressive language to communicate with Deaf people. You'll begin with an introduction to the language itself, and learn to create the signs for numbers. You'll also master the sign alphabet so you can fingerspell proper names. Then you'll learn to sign phrases and expand to complete sentences, and see how to put it all together so you can introduce yourself and start a conversation. Along the way you'll learn signs for colors, numbers, where you live, family, and the activities. Throughout, you'll learn by watching videos that demonstrate how to make the signs and how to incorporate facial expressions to communicate in this beautiful language. This course is taught using the best practices of the industry with a minimum of audio support. Throughout, you'll be immersed in silence, so you'll gain an understanding of the perspective of Deaf people and sign language.

THE WRITER'S INSTITUTE

Grammar Refresher

Whatever your goals, a grasp of English grammar is important if you want to improve your speaking and writing skills. This course will help you gain confidence in your ability to produce clean, grammatically correct work. You'll explore the basics of English grammar - like sentence structure and punctuation - as well as more sophisticated concepts - like logic and clarity. A patient instructor, memorable lessons, vivid examples, and interactive exercises will give you ample opportunity to put what you learn into practice. Reacquaint yourself with old, forgotten rules, meet some new ones, and discover your own grammatical strengths.

Beginning Writer's Workshop

If you've always wanted to write but have no idea where to start, this course will demystify the process for you. You'll get a taste of the writing life, improve your writing skills, and develop new ways to stretch your creative muscles. This exciting, hands-on course for the creative writing novice is filled with challenging exercises, expert advice, and plenty of direct support and encouragement. As you work your way through the lessons, you'll develop your own short, creative fiction or nonfiction piece. Our emphasis in this course is on developing your skills through practice, so you'll spend more time writing than reading. You'll master important concepts by completing enjoyable writing exercises and assignments, and you'll discover a variety of strategies and techniques the pros use to develop characters, create a compelling point of view, build interest through dialogue, and add meaning to your stories.

How to Write Historical Fiction

Is it history or is it fiction? Only the author really knows... In this class you will learn how to create historical settings in your writing, such as a believable wild west setting or 1888, when "Jack the Ripper" terrorized the Whitechapel district in London. How do you write both the people and language correctly for the time period? Or should modern opinions influence your book? You will also learn when it works to alter past events to fit your unique storyline. And most important, you will discuss the difference between historical fiction and narrative non-fiction.

Mystery Writing

What makes a mystery? If you consider the books you've read most recently, you may be surprised to discover that many—if not all—are mysteries. From Dan Brown to Dennis Lehane, mysteries are hot items on today's best-seller lists. This course will teach you the techniques you need to know if you want to become a best-selling mystery author. Mystery Writing begins by introducing the four story types and then explains how they relate to mysteries. It then reveals the three-act story structure, which is any story's key to success. Next, it shows you how to propel the action forward to a climax, followed by a catharsis in which your readers feel the release of tension that accompanies a great finish. And you'll write a complete scene from your story and learn the internal structure that makes every scene feel right. Finally, you'll delve into the special techniques that apply to mysteries, including crime scene description, MacGuffins, and the use of red herrings to misdirect your readers and create suspense. Follow the guidelines taught in this course, and you'll be well on your way to writing a successful mystery of your very own!

Advanced Fiction Writing

Do you have a manuscript, or parts of a manuscript, and need to know how to polish it for publication? Are you a published author who wants to learn techniques to write more effectively and efficiently? If you answered yes to any of these questions, then Advanced Fiction Writing is for you! In this course, you'll explore all the topics a writer needs to create a successful manuscript, including story structure, plot, character, dialogue, setting, suspense, conflict, action, viewpoint, tense, and even how to get published. Each lesson includes an assignment that will help you develop or polish your manuscript. And in the Discussion Area, you'll have an opportunity to share your work with classmates to obtain their feedback. Through this step by step process, you will have the tools to turn your story idea into a published book. Join us for the next six weeks, and you'll never look at fiction writing the same way again!

PERSONAL ENRICHMENT

Introduction to Internet Writing Markets

The Internet provides unlimited opportunities if you're a writer, whether you just have a few hours a week to blog or want a full-time publishing career or just plan to promote your books or business on the Web. There is no single way to become successful writing for the Web, so this course shows you the hundreds of different choices you have, and helps you set your own goals. In fact, by the end of the course, you'll have your very own publishing plan, from the steps to take in developing your writer's platform or brand, to the markets that will help you accomplish your goals. You'll learn the secrets of how to be successful in publishing online. That includes things like search skills, website traffic evaluation, identifying your own expertise and gathering it into a CV, research strategies, RSS feeds, online interview tips, crowdfunding large projects, and more. Markets are different on the Internet, so you'll take an in-depth look at them too. From paying publications to setting up a passive income earning stream, you'll go from the familiar, like online magazines, to the little known, like freelance marketplaces, along with different types of online jobs for writers. Ever wondered if it would be better to start a WordPress blog or a Twitter microblog? Whether it's legal to publish fan fiction or not? How you can make some extra money if you also take photos or make videos? This course will answer all your questions about publishing on the Internet. *Course Revised June 2015.*

Math Refresher - Online

This course will show you how to use math to your advantage. Math can be incredibly useful - but only if you understand how and when to apply it in your everyday life. You won't find any theory or memorization here. The lessons that make up this course are filled with practical exercises and information that you can put to immediate use. You'll find out some very interesting things about how calculators work, and then you'll discover how best to get a handle on your income and expenses. You'll be able to check your paystub, invoices, and bank statements for errors and overcharges, and you'll become more skilled at handling money and comparing investment opportunities. You'll learn how to calculate percentages, including the proper amount to pay in tips, commissions, taxes, and discounts. You'll find out how to calculate interest rates and you'll develop a better understanding of mortgages, credit cards, and other types of loans. You'll discover a handy method for converting one type of measurement to another, and you'll be able to calculate areas correctly so you don't overspend on your next home improvement project.

Yoga

Yoga is a practice of physical postures, integrated with the breath, to release tension and promote strength and flexibility of body, mind, and emotions. Yoga postures, breathing, and relaxation can alleviate many common problems that leave you feeling tired and drained of energy. Regular practice will: increase your strength, flexibility, and endurance; bring clarity and calmness to your mind and emotions; release muscular tension; help correct many postural problems; make you feel fit and vital; and help you relax. The ultimate benefit is that Yoga awakens a deeper awareness and understanding within you. This is a natural progression that begins with increased bodily awareness. As you become skilled at synchronizing breath and movement, you learn to turn your attention inward while moving. Eventually, you develop the recognition that is possible to stay centered and balanced in any situation.

Introduction to Natural Health and Healing

Would you like to learn more about natural health but don't know where to start? If so, then this is the course for you! We'll discuss the various stages of health and illness, and you'll discover that true health means wholeness of the mind, body, and spirit. You'll start a personal health journal to evaluate your current lifestyle and observe how your behaviors can affect your health. We'll also explore naturopathy, which seeks ways for the body to heal itself. You'll find out about proper breathing techniques that enhance health, and you'll learn the value of hydrotherapy, diet, biorhythms, and fasting. We'll also examine using the power of the mind for healing the body—discussing brain function tests, visualization, and relaxation therapies. You'll see the great power of belief. Then we'll delve into vitamins, minerals, antioxidants, free radicals, and the basic requirements that constitute a healthy diet. After our talk, you'll be able to develop menus that improve health. We'll also look at herbal healing, aromatherapy, body therapies, massage techniques, osteopathy, chiropractic, Tai Chi, reflexology, yoga, Feng Shui, therapeutic touch, natural remedies for common emergencies, and much more. By the end of this course, you'll have begun taking charge of your own health and healing!

Lose Weight and Keep It Off

Do you want to lose weight and keep it off? Now you can! In this comprehensive course, you'll discover how to establish a healthy approach to weight loss and weight maintenance. You'll master how to set and achieve weight-loss and weight-maintenance goals that make sense for you. Naturally, we'll begin with a discussion of the role of food in weight loss and weight maintenance. But we'll talk about far more than calories. From understanding food composition, portion sizes, and preparation methods, to meal composition and meal timing, you'll learn food basics—and beyond! You'll discover how to eat out without jeopardizing your weight loss or disappointing your taste buds. We'll also discuss the basics of planning and preparing meals at home, and uncover tips and tricks for navigating the social elements of eating. You may already appreciate that exercise is part of successful weight loss and weight maintenance. You may even know the differences between cardiorespiratory exercise, strength training, and lifestyle activity. We'll review these terms, and more important, discuss how to find exercise and activity that's enjoyable and helps you meet your weight-loss and weight-maintenance goals. You'll also discover how to take exercise to the next level and uncover thought patterns that negatively affect exercise and activity. Then we'll identify ways to overcome the challenges to regular exercise and activity. We'll determine the role of hydration in weight loss and explore how to overcome obstacles to good hydration. You'll see how your thoughts affect your weight and evaluate the role of body image, emotional eating, and more in your own life. We'll examine how important sleep is in weight loss, and you'll learn how to get better sleep and cope effectively with sleeplessness. We'll also probe the effects of stress on the body relative to weight and how to apply stress management techniques for weight loss and weight maintenance. You'll determine how other factors affect weight, like genetics, pregnancy, menopause, aging, and cravings.

Luscious, Low-Fat, Lightning-Quick Meals

Have you ever wished you had a personal chef preparing luscious, low-fat meals for you? This course is the next best thing! You'll learn how to ferret out fat in recipes, and discover how to reduce fat without sacrificing flavor or texture. Explore how to use flavor profiling to expand your culinary horizons. Learn how to prepare casseroles, crock-pot dishes, vegan dishes, oven-fried foods, meat-based meals, and many other entrees that are both nutritious and delicious! You'll discover how to get in and out of the kitchen faster, including tips for grocery shopping, menu planning, food preparation, and quicker cooking. You'll also learn a dietitian's tricks of the trade for encouraging reluctant family members to eat more healthfully. You'll have the chance to try out over 50 exciting and easy lowered-fat recipes for tasty entrees, side dishes, desserts, and garnishes, with each recipe demonstrating a topic that's covered in the lessons.

How to Get Started in Game Development

Whether you want to start your own indie game project in your basement or work with a small creative team or for a large game development studio, this course will prepare you to start developing your own games. You'll start by learning the fundamentals of game development and get an overview of game genres, platforms, and audiences. Next, you'll learn tools and techniques to help you make better design decisions and achieve greater efficiencies as you develop your own games. You'll learn why many games fail and how to ensure your games are positioned for success. During the course, you'll gain hands-on experience in many of the game development processes. By the end of the course, you'll have the experience and confidence to start developing your own game. Finally, we'll go behind the scenes of the game design industry to see how it started and where it's headed. You'll learn about the various roles in game development and how to pursue a career in the industry. When you complete the course, you'll be ready to start developing games right away! After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

Intro to the iPad

Thinking about buying an iPad or already have one, but maybe not sure how to put it to its best use? We will show you how to setup the iPad and how to use it. Learn basic maintenance, which accessories will maximize your experience, and how to use some of the pre-installed applications. Learn how to use the map to find directions and how to take pictures. You will be shown how to surf the web, and even find your device if it is lost. Use the mail app to connect with your friends and family. The iPad inspires creativity and hands-on learning with features you won't find in any other educational tool. If you own an iPad, please bring it to class. If you don't, you will have use of one during class time.

iPad: Intermediate User

This takes a more in-depth look into what your iPad can do for you. Learn how to manage your Contacts, Calendar, and Music. This hands-on class goes into the functionality of each application and how to best use its capabilities. Learn how to set up your calendar to organize and distinguish between family, work, volunteer and other events; set up playlists and more. You will also get to hear about some of the top apps out there and all the great things they can do for you. If you own an iPad, please bring it with you to class. If you don't, you will have use of one during class time.

Using Your Smart Phone for a Camera

Do you have a vacation, graduation or event this summer but you don't want to lug an expensive camera with you? No-worries - bring your smart phone! Today's smartphone cameras take excellent quality photos that rival your point and shoot camera. In fact, with the great photo taking and additional photo enhanced features on your phone, you may not need to carry an additional camera. Your phone is right at hand when you need it. In this class you will learn to explore how the camera interfaces with other apps on the phone. Topics include: taking photos with the smartphone, how to enhance and share photos, apps to modify photos and printing photos from your phone. You might be surprised just what your smartphone camera can do!

Mac, iPhone, and iPad Programming

The fastest-growing software market today involves mobile applications (or apps). In this course, you'll learn to use the free Xcode compiler and the Objective-C programming language to program your own apps that you can sell through Apple's App Store, reaching millions of potential customers around the world. You'll start with the basic steps to writing any program, then progress to using Xcode—the same compiler that Apple, Microsoft, Adobe, and many other companies use to write programs and applications. Along the way, you'll explore examples and perform simple coding exercises to build your confidence using Xcode and Objective-C. Even if you're new to programming or have experience programming a different type of computer, this course will offer the guidance you need to build your own apps. By the end of this course, you'll know how to find your way around Xcode and write Objective-C commands, so you'll be ready to start creating your very own Mac, iPhone, or iPad programs!

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

Introduction to Dreamweaver CS6

You've taken your first steps into Web design, and your fingers are beginning to cramp from all that typing—but don't panic! Developing your coding skills has not been in vain! You're ready for Dreamweaver—Adobe's preeminent Web development application—which has been designed from the ground up to make developing websites easier. You'll learn how to use Dreamweaver's intuitive tool set to structure text, and investigate the myriad formatting options CSS provides. Work with images, build navigation elements, discuss effective layout methods, learn where and when to use tables, and examine successful site planning strategies. By the end of the course, you'll have successfully built a website and know how to use Dreamweaver's built-in FTP tools to upload to the server of your choice.

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

Introduction to Photoshop CS6

Photoshop is the world's best-known photo-editing program. Artists, photographers, designers, and hobbyists all rely on Adobe Photoshop for image creation and editing. You'll learn how to use Photoshop with detailed, step-by-step instructions that you'll have no trouble following—even if you've never used a computer graphics program before! And you'll have a lot of fun doing it. Photoshop CS6 has a host of impressive new features for photographers, and you'll encounter a number of them. We'll begin with an introduction to the Photoshop environment. Next, you'll learn techniques for creating simple digital paintings (including some brushes that let you create the look of an oil painting from a photo). Then you'll be editing your own photographs to get rid of dust and scratches, fix the color, and correct image exposure. You'll master techniques for switching the backgrounds on images and removing wrinkles and blemishes from photos, just like they do in magazines. You'll also learn about the new content-aware Move tool in CS6 that, like magic, lets you move something on an image while intelligently replacing the "hole" left behind. By the time you finish this fun, hands-on, project-oriented course, you'll be well on your way to expressing yourself with the most exciting graphics program ever developed.

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

Intermediate Photoshop CS6

Photoshop is one of the most amazing software programs ever developed. It's a fun and creative way to alter photos and prepare them for print or the Web. In this course, you can take your Photoshop skills to the next level by exploring more advanced features in Photoshop that let you easily re-edit projects long after they were originally created (and long after the Photoshop "undo" command has expired). These techniques, called non-destructive editing, let you work faster and reuse parts of images over and over again. If you like scrapbooking or want to make page layouts that you can fill with different graphics, you'll learn how to create reusable templates. You'll see how to use Smart Objects, so that even if you crop or resize an image. Whether you're a photographer who wants to use Photoshop to edit photos, a scrapbooker, or an artist, this course will teach you the building blocks you need to unleash your creativity. It's also a lot of fun!

After you register, you will receive an email with instructions on how to set up your password to enter into your online class.

MOTORCYCLE SAFETY

Motorcycle Safety: Basic Rider

Participants will learn the special skills and mental strategies necessary for responsible motorcycle operation. Basic Rider course is divided into two levels. Level I concentrates on the basic skills of clutch and throttle control, straight-line riding, turning, shifting and stopping. Level II builds on the basic skills and provides practice in the collision avoidance skills, stopping in the shortest distance, swerving, and proper cornering techniques. Students will learn about the motorcycle controls and how to operate them, and how alcohol and other drugs affect one's ability to ride safely. A very important segment of the course will instruct students how to create their own strategy for riding in traffic, and dealing with special situations. The instructors, all experienced motorcyclists, will advise on what to wear for protection and comfort.

Note: When registering for this class, please make sure you enter an email address that you check often. A letter with a coupon code will be emailed to you the week before your class. This is important and you will need the code to enter the online portion of this class.

Kids On Campus

TEENS ON-CAMPUS

Frederick Community College SUMMER 2016 YOUTH PROGRAMS

FCC offers an exciting variety of fun-filled week-long morning and afternoon classes this summer. Be sure to sign up for Lunch Bunch for all day programming at FCC. Register early—popular programs fill quickly!

Kids on Campus

Exciting, interactive educational enrichment programs, designed especially for children from 4 to 11 years of age. Here's just a sample of what's happening:

- Adventures with American Girls
- Bugs, Lizards & Things that Fly
- Clay-Mation Movie Magic
- How to Build a PC
- Kids Take Over the Kitchen
- LEGOs! Animation, Robotics & More
- May the Force Be with You
- Music for Munchkins
- Rock on Dinosaurs!
- Space Exploration: Create & Explore (with LEGOS!)
- The Magic of Science

Teens on Campus

A cool selection of hands-on programs encourage tweens and teens to learn fundamental concepts while exploring new ideas and making new friends including:

- Black Light Illumination Theatre
- CAD (Computer Aided Design)
- Comic Book Creations
- Computer Animation
- Fencing Academy
- Fine Art Classes
- Improvising Rock Guitar
- Mud Loving Teens
- Safe Sitter Babysitting Training
- Study Skills Classes
- Video Game Design: All Levels

See our complete summer schedule on pages 45-60 and register today! Frederick.edu/QuickEnroll

Karen Freeman • Program Manager • kfreeman@frederick.edu
7932 Opossumtown Pike, Frederick, MD 21702 • 301.846.2661

PROGRAM GUIDELINES

Thank you for your interest in youth programs at FCC. Please note, an Emergency Contact Form, completed during registration, is required before a child participates in a program. As FCC is a public institution, students and visitors may be photographed and appear in marketing materials without prior permission. To have your child(ren) excluded from these photographs, indicate your request on the Emergency Contact Form. Questions? Call 301.846.2661.

Little Guys & Gals

Spanish for Kids

Explore Spanish language and Mexican culture with a Fiesta theme. Play, sing, laugh, and learn through movement games, arts and crafts, music, and dance. Learn basic phrases and conversations and the alphabet. Sample Mexican food (no peanut products) and cultural activities each day. Party on the last day (parents are invited) as you perform songs and dances, share arts and crafts projects, and enjoy some cultural treats. Classes will be taught by native or near-native speakers. Class size is limited to 12 students.

AGES 4-6

KOC164 | 15 hours | \$109

5086 M-F 7/25-7/29 1 p.m.-4 p.m. E106 Doherty

Language Sampler

Let Senor Chris and his friends introduce you to five different languages in one week! Each day will focus on one particular language and will utilize themes, songs, crafts and games specific to that language. The languages include Spanish, Braille, French, American Sign Language (ASL), and Chinese. By the end of the week you'll have an introductory exposure to the languages and cultures, be able to identify basic colors, count to ten, speak greetings and farewells and, in the cases of Chinese and ASL, write or spell your name using special characters. Our multi-cultural party on the last day (parents are invited) will be a performance of songs and dances, sharing of arts and crafts projects and some tasty treats from all our countries. Classes will be taught by native or near-native speakers. Class size is limited to 12 students.

AGES 4-6

KOC166 | 15 hours | \$109

5087 M-F 7/11-7/15 1 p.m.-4 p.m. E106 Doherty

Please Tell Me a Story

Join in the fun with a different book each day. Listen to stories by Maurice Sendak, Shel Silverstein, Eric Carle, the whimsical Dr. Seuss and others and then spend time celebrating the story through games, story theatre and arts and crafts. You might even create some of your very own snacks. Each day will focus on a different story and promises to be filled with silliness and fun.

AGES 4-6

KOC311 | 12 hours | \$89

5143 T-F 7/5-7/8 1 p.m.-4 p.m. E106 Bonanno

5144 M-F 8/1-8/5 1 p.m.-4 p.m. E106 Bonanno

Tiny Travelers – A Global Magic Carpet Ride!

Travel to a different part of the world each day and experience the diversity of the earth. Take a Safari ride on the Serengeti to see elephants and giraffes or float down the slow waters of the Amazon River. The world is a big, magical place and through games, music, stories and art, you'll have the experience of a life time without leaving the classroom, except in your imagination!

AGES 4-6

KOC547 | 15 hours | \$109

8181 M-F 6/27-7/1 9 a.m.-12 p.m. E106 Pruet

5085 M-F 7/25-7/29 9 a.m.-12 p.m. E106 Pruet

Bugs, Lizards, and Things That Fly

Learn about bugs, butterflies, lizards, and owls. We'll read stories, share pet pictures and our stuffed animals, explore the lives of animals and their habitats, even dissect owl pellets to find out what owls eat. We'll get creative and write our own animal story and craft a bookmark, paint a food chain or habitat, create chromatographic butterflies and even build LEGO® critters and label all their parts! And don't forget the snacks! We'll chow down like the Very Hungry Caterpillar and maybe you'll try something you've never tasted before!

KIDS AND TEENS ON CAMPUS

Let's Get Growing

Get your hands dirty in this hands-on science class that explores the importance of plants and how they help people and animals by producing food and oxygen. Through science activities, art, stories, music and movement you'll discover how plants are the seeds for a lifelong relationship with the earth. Colorful creations, delightful projects, and whimsical activities will ensure an enchanting experience into the world of plants as you learn what it takes for a plant to sprout and bloom and what important roles the sun and rain play in the growth of these amazing living things.

Arts, Music & Culinary Delights

Creating Comics

Do you dream about monsters and aliens? Does your imagination work overtime creating dialogue for your characters and setting up action scenes? Can you picture yourself as a cartoonist? Learn to develop your characters, giving them personality and life. Have fun creating superheroes, monsters, aliens, or just regular kooky characters. Learn techniques in basic perspective, anatomy, facial expressions, panel composition, lettering, penciling, and inking. Understand how to lay out panels and get your ideas to flow. By the end of the week, you'll design, write, and draw your characters into one of many comic formats.

LEGO®, Technology, Robotics & MORE!

We Do Robotics

LEGOS® + Robots + Computers = Education, the LEGO® Way! In this program for younger LEGO® builders, you will build LEGO® models featuring working motors and sensors, learn simple programming techniques to make models perform simple tasks and explore a series of cross-curricular, theme based activities, all while developing skills in science, technology, engineering, mathematics, language and literacy. Translation? Fun! LEGO® soccer players kick the ball, cranes lift creatures, motorized bridges open up, all created and programmed by you! Simply said, by using drag and drop software, you will learn how to program robots made from LEGOS®.

Robotic Creations with Motorized Kits

Join us as we set out for a week of exploring and building robots. Students will work in pairs to use LEGO® Mindstorms Robotics. Build a robot that will follow your commands and modify and test various robot creations. Using a computer and an infrared transmitter, students will program their robots to meet various challenges we put in place. Bring along your enthusiasm and imagination - we'll have a blast with robotics fun!

Advanced Robotic Creations

The next step in programming and building robots! Students will use their existing knowledge of LEGO® Mindstorms to tackle tougher challenges and learn how to use all new sensors. Build a robot that will follow your commands and control wind turbines and solar power cells. Students must have taken LEGO® Mindstorms: Robotic Fun at least twice or have a vast knowledge of the NXT software as well as the base Mindstorms kit. Students who take this course will be tasked to complete the most difficult of robotic challenges!

Computer Animation with Action Figures and More!

Using LEGOs®, action figures, lights, cameras and computers you'll create action! Explore the world of animation, from zoetropes and flip-books to object animation. Learn the basics of stop-motion animation. Then, using a variety of LEGO® kits or popular action figures, build and create a storyboard, script, scenery and special effects. Once you've established aspects of the story, film your animated mini-movie.

Advanced Computer Animation

If you've tried stop motion animation with LEGOs® or clay, you know how magical the process is. This class is for students interested in pursuing advanced stop-motion animation techniques to a higher degree using LEGOs® and action figures. Learn and practice more complex processes, such as making a lightsaber glow or editing a spaceship so that it looks like it's flying. Crop your own photographs to use as background and to increase the illusion of motion. Each student will create a short video, individually or as part of team. This is a fast-paced class. Students should be familiar with the basics of stop-motion (there will be a review at the start of class).

Minecraft: Architecture - Seven Wonders Of The World

Combining the open world of Minecraft and the versatility of LEGO®, students will learn about various types of architectural wonder. From the Great Wall of China to the Empire State Building, students will study about the architects who helped to create these masterpieces of craftsmanship and then build their own. Students will begin by exploring building designs and then use the computer to recreate them using Minecraft and LEGO®s. Combining what they have learned with their imaginations, they will create their own architectural marvels, focusing on their own Wonder of the World.

NEW! Design and Fly: An Introduction to Drone Technology

Beginning with the use of a tried and true paper airplane, students will learn about technology and aerodynamics. Then the standard paper airplane will be outfitted with a controller that will allow the student to fly the airplane, or unmanned aerial vehicle, with their smart phone. The course will focus on how a plane flies, how it is controlled and basic aircraft design. Students will begin with a proven design and be tasked with designing their own airplane by the end of the week. Student's designs will be showcased during the last class with a student show and tell and a friendly race! **Students are required to bring a smart phone to class each day. Class fee includes a power up Drone kit complete with a control module, motor and heavy duty paper that goes home with the student at the conclusion of the class.**

**NEW! Rube Goldberg Machine:
A Crazy Solution to a Simple Task**

Who is Rube Goldberg? What are Simple Machines? This class is all about the wonderfully wacky inspirations of Rube Goldberg- an inventor, cartoonist and engineer of wild motion machines named after him. The sole purpose of these machines is to accomplish a simple job through multiple bizarre steps. Student inventors will work in small teams to design and create their own Rube Goldberg-style inventions which will sharpen their skills in physics, creativity and humor. Students will be challenged to create Rube Goldberg inventions (a series of simple machines that accomplish a simple task) using familiar and found objects such as ramps, rope, tubes, weights, balls, funnels, recyclables and most importantly, lots of Duct tape. This class is dedicated to exploration, design and fun with activities including the construction of massive domino chains, creating your own machines, and trying to build a better mousetrap. If you like drawing, art, engineering and antics, this is the class that will keep your imagination in perpetual motion.

AGES 11-14

KOC331 | 15 hours | \$129

8179 M-F 6/27-7/1 9 a.m.-12 p.m. F145 Duckworth

AGES 8-11

Structural Engineering

Learn what it takes to become a junior engineer. Plan and construct complex projects and structures using simple household materials. Design and build bridges, towers and domes out of drinking straws, toothpicks, Popsicle sticks and balsa wood. Students compete against each other in a friendly competition to see who can design and build the strongest structures.

AGES 8-12

KOC636 | 15 hours | \$129

5072 M-F 8/8-8/12 9 a.m.-12 p.m. F145 KOC Instructor

Rocketry

Learn what it takes to become a junior rocket scientist as you study the history and principles of rocketry before creating your own missile masterpiece. Not only will you get to design and build a solid fuel rocket and a bottle rocket, but you'll also design a parachute system that can safely land an egg back on earth. Newton's Law of Motion? You got this!

**NEW! World Conservation Game:
Protecting our Oceans**

Since the earth is two thirds water, what would happen if that water became toxic? It would affect much more than the quality of the water. It would affect all plant, animal and human life. What if people got together to find solutions to the problem? Not just on a local level, but on a global scale because it would be a global problem. Join a team of peers who care about the oceans and want to find new solutions to what could easily become a world crisis in the near future. In this class you'll not only tackle a better understanding of the issues, but through hands-on activities and games, lively discussions and thought provoking conversation, you'll work towards new solutions and strive to end the problems facing our oceans today.

**NEW! World Conservation Game:
Natural Resources**

What would happen if the earth suddenly ran out of oil and gas? Viable options for energy include sun, wind and water, but are there others as well? Explore the world of natural renewable resources and discover the efficiency of each. Can each resource work on a local as well as global level? Join a team of your peers who want to find solutions to the natural resource dilemma. You'll not only tackle a better understanding of the issues, but through hands-on activities and games, lively discussions and thought provoking conversation, you'll figure out new and better solutions to the problems that don't include depleting the earth of her natural resources.

Trading Card Games- Create and Play

Are you interested in trading card games like Pokémon, Magic: The Gathering, My Little Pony or Yu-Gi-Oh? If you've ever wanted to design your own game, this is the class for you. Begin by studying how these card games work and how to play them. Using what you have learned about some of the most popular card games you'll create your very own Trading Card Game by designing the cards and crafting the mechanics, the rules, the strategy and then printing and laminating the cards into functional playing decks. How about an official tournament for your new card game? Since most popular card games start out with homemade art and lamination, you might end up designing the next Magic: The Gathering.

Middle School Math

Middle school is right around the corner and this is your chance to get a jump start on 6th or 7th grade math. Be two steps ahead or more, who's counting, (well, you are) after you take advantage of this enjoyable and practice-filled math experience that will prepare you for the upcoming year in math class. Through math games, group activities and individual study, learn about rational numbers, ratios and proportions, statistics and probability, expressions, equations and more. This class helps prepare for the new common core curriculum for FCPS students, but is beneficial for home school students as well. Please note: This class is intended for students going into 5th grade accelerated math or 6th or 7th grade math classes and is not intended for elementary students who are not going into accelerated math.

Get Ready for Algebra

Prepare for the common core curriculum and become competitive with students nationally by taking this class taught by an FCPS math instructor. Depending upon your math experience, in this class you'll either get a great review of what you've already learned or catch a preview and start to grasp hold of the FCPS Algebra curriculum. This class will be divided equally between math games, group activities and individual study in an entertaining atmosphere. Learn about equations, linear relationships, patterns and functions, quadratic functions, exponential functions and more. This is not your typical math class experience ... so much better, so much more fun! This class is designed for students entering 8th grade Accelerated Math or 9th grade students entering Algebra, and is not designed for elementary students.

AGES: SEE COURSE DESCRIPTION

5079 M-F 7/18-7/22 1 p.m.-4 p.m. F109 Nosoff

NEW! Eighth Grade Math, We're Coming for You!

High School is coming fast and here is your chance to get a great review of material you've already learned or catch a preview of 8th grade math. This exciting math class will cover expressions, equations, linear relationships, patterns and functions, real numbers, Pythagorean Theorem and more! In this class you will learn skills through math games, group activities, projects and individual studies. Take advantage of this stimulating class taught by an FCPS math instructor. This class is designed for students entering 7th grade accelerated math, 8th grade math, or for students entering 9th grade who are looking for a review.

Study Skills & Test Preparation

Study Skills and Test Taking Strategies for Middle School Students

How to get organized, take good notes, and study effectively are just a few of the techniques you'll discover in this class that brings test-taking strategies and study skills together in a fun-filled and relaxed atmosphere. Learn methods to keep track of important papers and assignments, figure out how long assignments may take, and discover how to break big projects into smaller ones. Slow down, breathe deep, and take this class. It will teach you the skills needed to be successful in middle school and beyond.

7932 Opossumtown Pike • Frederick, MD 21702 • (301) 624-2888 • CEInfo@Frederick.edu

REGISTRATION INFORMATION

REGISTER ONLINE

Frederick.edu/QuickEnroll

- **Sign In** or create a new student profile*
- **Browse** by category or use the search feature. Click on class titles for descriptions and details.
- **Register** by clicking “Add to Cart”, then “View Cart” and select “Check Out” to submit payment. Two separate emails will then confirm payment has been received and registration is complete.
- **Online Classes** After registering for an online class, a third communication will arrive (up to 48 hours prior to the class start date) with details and steps to access your online classroom.

Important Notes

- Courses requiring prerequisites and/or program manager approval may not be available for online registration. See individual course details for complete information.
- To pay for classes by cash, check, or money order, please register in person in our new Registration Office in the Conference Center.

**If you registered for a class since June 2014, an online profile is reserved in your name. Please do not create a new profile and call 301.624.2888 to complete the set-up process. Thank you.*

REGISTER IN PERSON

CEWD Registration Office - Conference Center - E Building

New! The Continuing Education and Workforce Development Registration Office is now located in the Conference Center (E Building). Visit us for assistance with online registration and to register in person.

M-Th 8:30 a.m. - 8:00 p.m. • F 8:30 a.m. - 4:30 p.m.
301.624.2888 • CEInfo@Frederick.edu

Please continue to visit Jefferson Hall (J Building) for student services including Admissions, Counseling & Advising, and Financial Aid. Learn more at www.frederick.edu (keyword: admissions).

REGISTRATION FEES

Registration Fee - A \$5 per-term* registration fee is due at the time of registration. Subject to change, this fee is only refundable when FCC cancels a class or a student drops a class at least one business day prior to class start AND the canceled/dropped course is the only class the student has enrolled in during the designated term.

Out-of-County Fee - Maryland students residing outside of Frederick County are charged an additional \$5 per class per term*.

Out-of-State Fee - Non-Maryland residents are charged an additional \$10 per class per term*.

**Terms are defined as January 1 through June 30 and July 1 through December 31.*

DROPPING A CLASS

Students may drop a class for a refund at least one business day prior to the class start date by completing the drop section of a CEWD registration form (available at frederick.edu, keyword: registration form) and submitting the form to staff in the CEWD Registration Office (Conference Center E-Building), by email to CERequest@frederick.edu, or by fax at 301.624.2749.

Please note, refunds are determined based on the date a request is received. Exceptions to this policy must be requested in writing to the Vice President of Continuing Education & Workforce Development and are made on a case-by-case basis. Contact us with questions at 301.624.2888.

COURSE REFUND POLICY

If FCC cancels a class, all applicable tuition and fees are refunded to students. If a student wants to withdraw from a class and receive a refund, please see the “Dropping a Class” section. Payments made by credit and debit card are refunded directly to student’s credit or debit card account. Refund for payments made by cash, check, or a money order will be mailed to the student usually within 10 to 14 business days.

Please note, refunds are determined based on the date a request is received. Exceptions to this policy must be requested in writing to the Vice President of Continuing Education & Workforce Development and are made on a case-by-case basis. Contact us with questions at 301.624.2888.

SENIOR CITIZEN STUDENTS

Tuition on select eligible courses is waived for Maryland residents 60 years of age and older. Associated course fees (books and/or supplies) may still apply and are due at the time of registration. Eligible courses are identified by the “SW” icon following course descriptions. Please contact FCC Student Accounts at 301.846.2658 for assistance or additional information.

DISABLED AND RETIRED STUDENTS

Permanently disabled Maryland residents out of the workforce are exempt from payment of tuition for classes designed to assist in securing employment as defined in Section 16-106 Education Article, Annotated Code of Maryland. Eligible individuals may take up to 12 credits per semester when enrolled in a degree or certificate program designed to lead to employment. Otherwise, individuals may enroll in classes equating to 6 credits per semester. To receive a disabled and retired waiver of tuitions, students are required to:

- Provide certification of total and permanent disability from the Social Security Administration, the Railroad Retirement Board, or Federal Office of Personnel Management.
- Submit payment of course fees (required to hold classes).

For additional information and assistance, contact us at 301.846.2480 or visit www.frederick.edu (keyword: Tuition & Fees).

DEFERRED TUITION PAYMENT PLAN

Students in select Continuing Education & Workforce Development programs (noted below) may enroll in an interest-free Deferred Tuition Payment Plan whereby participants authorize FCC to withdraw a pre-determined monthly payment from a checking account, debit card or credit card. A \$25 non-refundable enrollment fee is required to participate.

Deferred Tuition Payment Plan Programs

- Certified Nursing Assistant (CNA)
- Phlebotomy
- Medical Billing & Coding (Online)

For additional information and assistance, contact us at 301.846.2480 or visit www.frederick.edu (keyword: Tuition & Fees).

BILLING ARRANGEMENTS

Full payment of tuition and fees or third-party payment documentation must accompany the completed registration form(s). Students are individually responsible for payment of tuition, fees and all other charges. If the college does not receive payment from third parties, students will be billed directly for all charges and are expected to pay.

Employees of businesses that operate within Frederick County are eligible for in-county tuition, regardless of their legal domicile. The employee must provide verification of current employment from the human resources office of the Frederick County business at the time of registration.

COURSE ENROLLMENT – REGISTER EARLY!

Maximum enrollment - Every class has a maximum number of students that may enroll and popular classes fill quickly.

Minimum enrollment - Low enrollment may result in a class cancellation. These decisions are typically made three business days prior to the class start date.

COURSE CHANGES

The college reserves the right to make changes in any course or class due to unforeseen circumstances.

BOOKSTORE (STUDENT CENTER, ROOM H-117)

Continuing Education textbooks can be purchased a week prior to the class start date.
 Monday – Thursday..... 8:30 am to 8 pm
 Friday 8:30 am to 1 pm

SERVICES FOR STUDENTS WITH DISABILITIES

The college provides support services to maximize independence and encourage the integration of students with disabilities into all areas of college life. The particular needs of each student are considered on an individual basis. Students with disabilities are encouraged to contact the Services for Students with Disabilities office as early as possible after applying for admission. Call 301.846.2408. Reasonable accommodations, based on documentation, are then offered to qualified students for courses and placement testing. Students in need of sign language interpreting services should contact the office two weeks prior to the beginning of classes to ensure services are in place.

Requests for sign language interpreting may be made to the Coordinator for Deaf/Hard of Hearing Services at 301.846.2476 (Voice) or via e-mail at interpreting@frederick.edu.

CONTINUING EDUCATION RECORD

Please contact the Welcome Center in writing to obtain a copy of your noncredit course record. Course records contain a student’s complete noncredit course history as of July 1, 2001. Beginning fall 2004, the record also records whether a CEU-bearing course was successfully completed.

The Continuing Education Certificate is an informal award (does not count towards a degree or academic certificate requirements) offered by Frederick Community College. The certificate is awarded in identified noncredit instructional areas for individual courses or an identified sequence of courses generally totaling 90 or more hours of instruction leading to an occupational objective. Instruction typically consists of noncredit learning experiences but may also include credit coursework.

FAMILY EDUCATIONAL RIGHTS & PRIVACY ACT OF 1974 (FERPA)

FERPA, commonly known as the Buckley Amendment, was issued by the Department of Health, Education and Welfare in the 1976 Federal Register. The regulations were transferred to the Department of Education when it was established and codified in Part 99 of Title 34 of the Code of Federal Regulations.

The purpose of FERPA is to afford certain rights to students concerning their educational records. FERPA applies to all schools that receive funding under most programs administered by the Secretary of Education. Most post-secondary institutions, both public and private, generally receive such funding and must, therefore, comply with FERPA. FERPA applies to all education records maintained by a post-secondary institution, or by any party acting for the institution, which are directly related to the student. These include but are not limited to assessment test scores, academic standing, rosters, class schedule, or any information that would make the student’s identification easily traceable. FCC may release directory information, which includes student’s name, dates of attendance, and enrollment status—see the FCC catalog for a complete list. Students wishing to restrict directory information must contact the Welcome Center (in writing) with their request. Contact the Welcome Center for additional information.

ALTERNATE CALENDARS

FCC continuing education classes are held at several off-campus locations. Each off-campus location is closed on specific dates for a variety of reasons (e.g., Parent-Teacher Night, special holidays, etc.). The first night of class, your instructor will discuss information about any holidays or closings which affect your classes.

REGISTRATION INFORMATION

CONTINUING EDUCATION UNITS (CEU)

The continuing education unit (CEU) was created to provide a standard unit of measure, quantify continuing adult education and training activities (non-credit), and serve the diversity of providers, activities, and purposes in adult education. One CEU equals ten contact hours of participation in organized continuing education/training experience under responsible, qualified direction and instruction. To receive CEUs you must attend a CEU-eligible class, attend at least 80% of the class, and meet all class requirements.

AGE REQUIREMENT

Students should be at least 16 years of age to enroll in most continuing education courses, except for those courses specifically designated for younger students. Students under the age of 16 who have completed at least the seventh grade may be permitted to enroll on a case-by-case basis. Students will be considered for such admission if they demonstrate the ability to profit from instruction based on a set of specific criteria. For more information, call the counseling office (301.846.2471). Certain programs or courses of study include higher minimum age for participation when the college has determined that age is a factor necessary to the normal operation of the program or activity. Minimum age is used as a measure or approximation of the level of maturity, judgment and social independence needed for successful participation in the program or activity in addition to academic skills. [Authority: 34 CFR 110.12]

Certain programs offered by the Institute for Learning in Retirement **are** offered as special benefits for seniors, and include a minimum age for participation in the program or activity, as is permitted by federal law. Classes may be opened to other interested individuals if space is available. [Authority: 34 CFR 110.16]

COLLEGE POLICIES & PROCEDURES

All students agree to abide by the policies and procedures of Frederick Community College, including those concerning drug and alcohol abuse, weapons on campus, student conduct, classroom behavior, discrimination, grievance, and other policies and procedures. Students understand that not abiding by these policies and procedures will subject them to the penalties stated within. See www.frederick.edu for student policies and procedures and the Student Code of Conduct.

SCHOLARSHIPS

Scholarships are available for students who enroll in continuing education programs. Students interested in applying for Continuing Education scholarships should email foundation@frederick.edu and include CE scholarships in the subject line.

Location Key
